

Project Management

Goals

- You are aware of the importance of strategic project management
- You are familiar with two main project management methodologies
- You can create and use a Gantt chart to map your project goals

Project Management

What is a project?

*“It's a temporary endeavor undertaken
to create a unique product, service or result.”*
(pmi.org)

Project Management

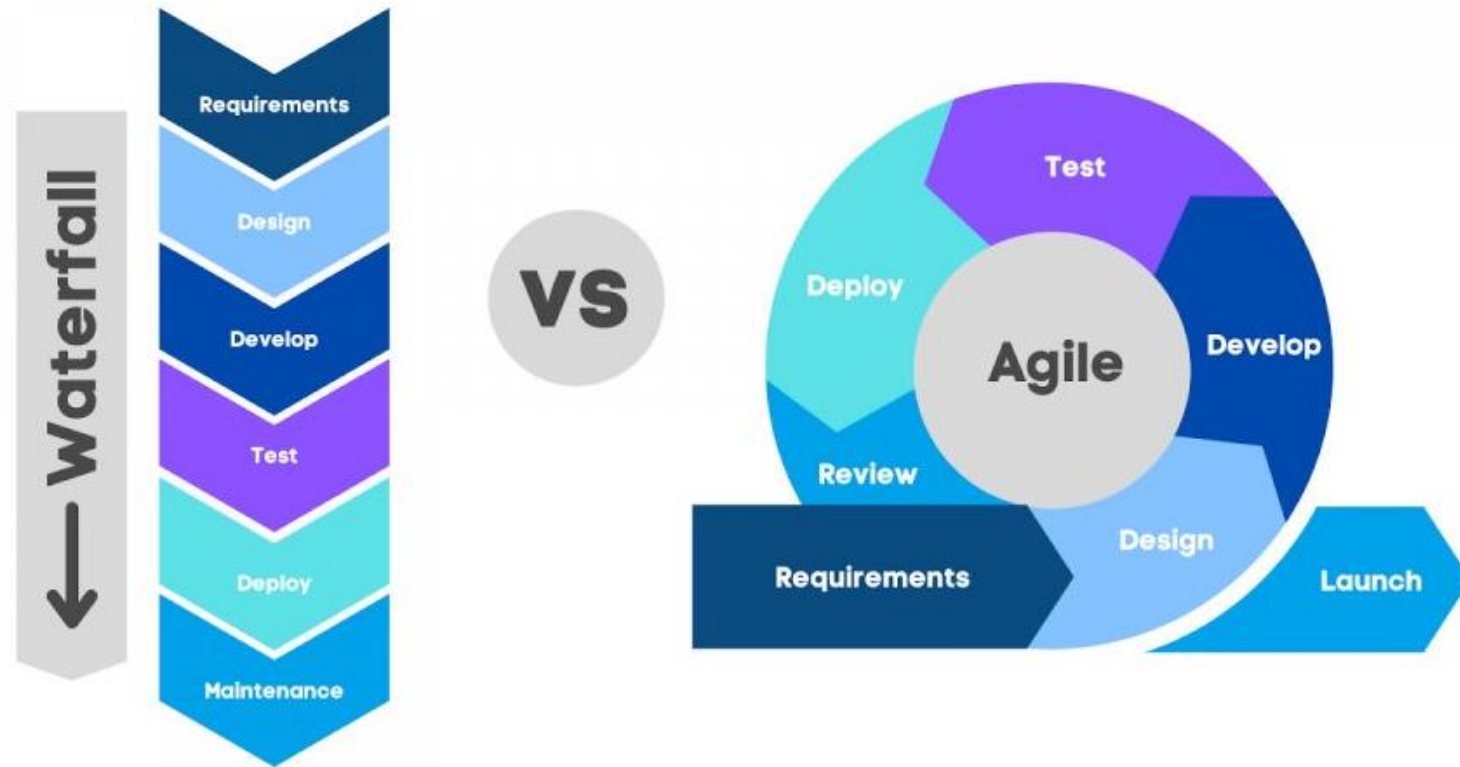

Discuss the following questions in pairs:

- Think back to a time when a project did not go well.
 - *What happened?*
 - *How could it have gone better?*
 - *What do you wish you had done differently?*
- Think back to a time when a project went well.
 - *What went well?*
 - *How could it have gone better?*

Five Surprising Facts About Project Management

1. Fewer than a third of all projects were successfully completed on time and on budget in 2016. (Source: Standish Group)
2. High-performing organizations successfully complete 89% of their projects, while low performers complete only 36%. (Source: PMI.org)
3. Businesses identified “capturing time/costs against projects” as their biggest project management challenge. (Source: The Access Group)
4. 44% of project managers use no software, even though PWC found that the use of commercially available PM software increases performance and satisfaction. (Source: Pricewaterhouse Coopers)
5. An astounding 97% of organizations believe project management is critical to business performance and organizational success. (Source: PricewaterhouseCoopers)
